to ExMachina::Config with: ...

to ExMachina::TradeAgain wi...

to Report with: Report:Prof...

(1) Define your trade contract

Market: **Derived** > **Continuous Indices** > **Volatility 100 Index**

Trade Type: **Digits** > **Matches/Differs**

Contract Type: **Both**

Default Candle Interval: **1 minute**

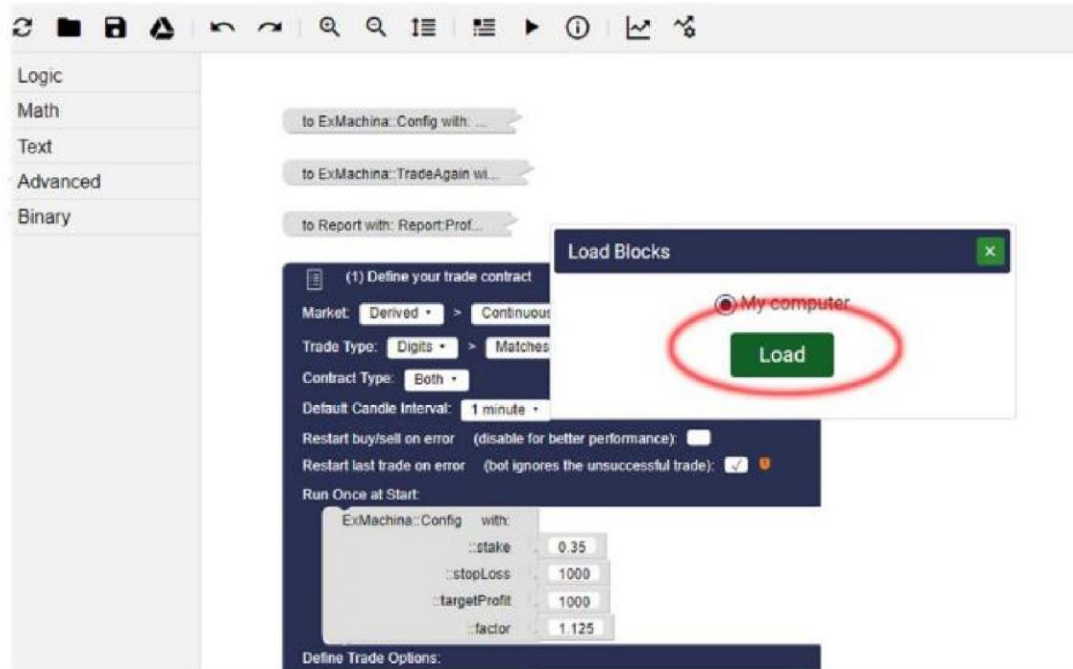

Restart buy/sell on error (disable for better performance): ☐

Restart last trade on error (bot ignores the unsuccessful trade): ☒

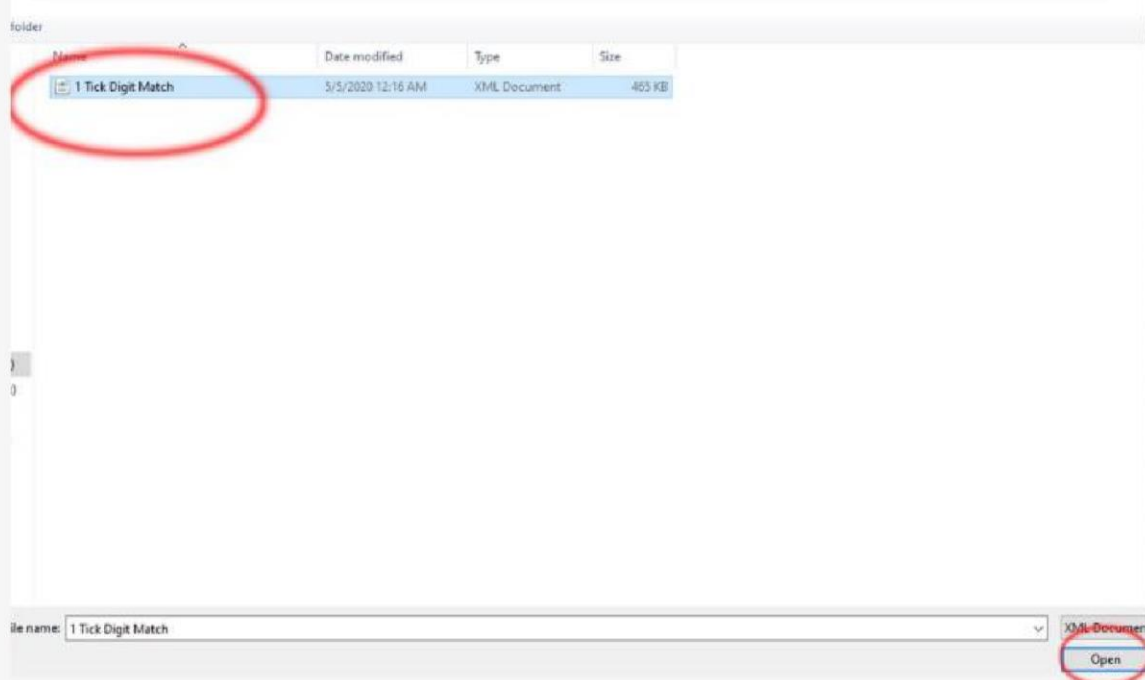

Run Once at Start:

ExMachina::Config with:

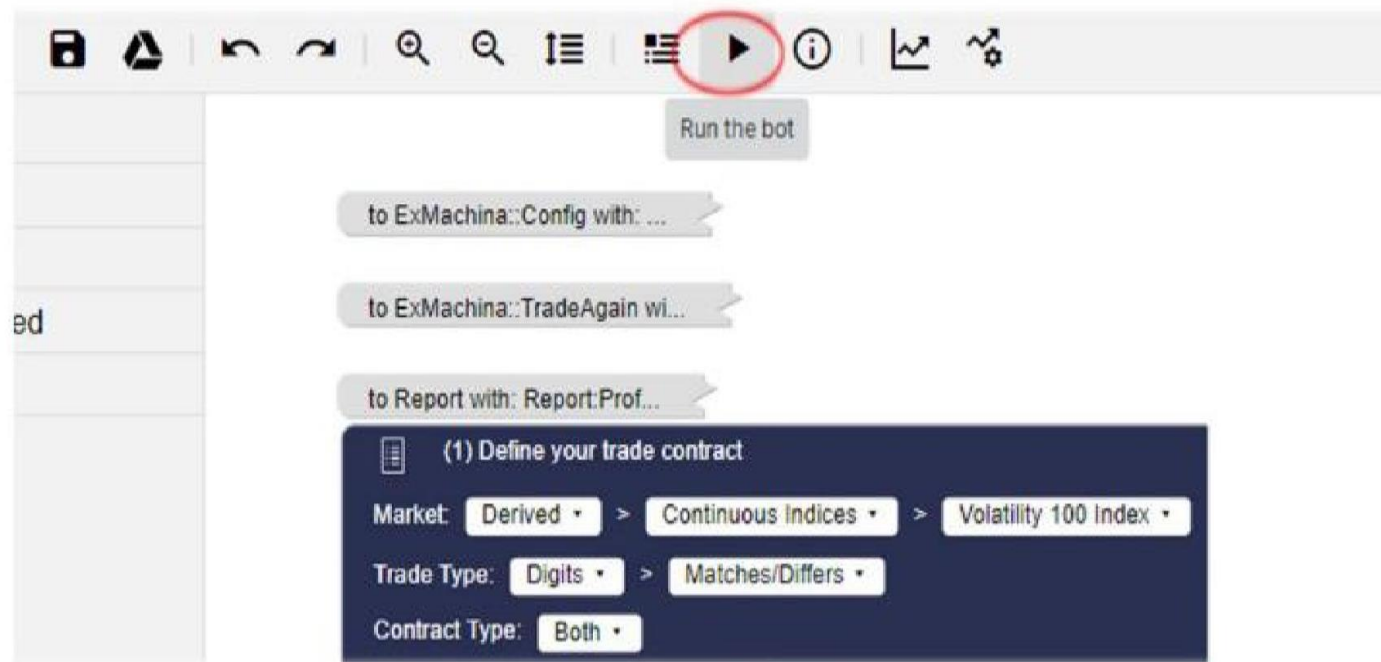

## Step 5: Click On Load Button

## Step 6: Select XML Bot File You Downloaded And Click Open

## Step 7: Click On Run Bot

The screenshot displays a software interface for configuring and running a trading bot. At the top, a horizontal toolbar contains various icons: a save icon, a folder icon, undo and redo arrows, zoom in and zoom out magnifying glasses, a list icon, a flag icon, a play button icon (highlighted with a red circle), an information icon, a line graph icon, and a settings icon. Below the toolbar, a vertical sidebar on the left is partially visible with the text "ed". The main workspace contains three grey arrow-shaped buttons pointing right, labeled "to ExMachina::Config with: ...", "to ExMachina::TradeAgain wi...", and "to Report with: Report.Prof...". Below these is a dark blue panel titled "(1) Define your trade contract" with a list icon. This panel contains three rows of configuration options, each with a label and a dropdown menu: "Market:" with "Derived", "Continuous Indices", and "Volatility 100 Index"; "Trade Type:" with "Digits" and "Matches/Differs"; and "Contract Type:" with "Both".

Run the bot
